

SILVER BULLET TO YOUR RIGHTS

Posted on August 20, 2014

Everyone has tried many complicated and time-consuming things to retrieve their rights. I will not go into all that has been tried, happened and failed. It would be too time consuming and most would not understand. Here's a brief description of how this works.

When you got your Social Security number, either you or your Mom or Dad checked off that you were a U.S. Citizen on the SS-5 application. And then you continued to claim to be a U.S. Citizen throughout your life and did so on the W-4 form when you were employed which caused you to pay taxes, get tickets and every other act of treason that has happened to you.

A U.S. Citizen is a legal fiction and has no rights secured by the Constitution. You should have checked off "other" on the form because you are a State Citizen of your state, which makes you a Citizen of all states and a benefactor of the u.S.A. constitution of 1789. A State Citizen used to be known as a Citizen of the United States but has changed the meaning for the purpose of fraud.

So to reclaim your citizenship you need to get a passport as a "State Citizen." However you will not find any such term on government documents because they are hiding it from the public. They use terms such as "non-citizen national" or "other." When you get your passport it will look like any other and say that you are a national of the U.S.A. This is true if you are a State Citizen, 14th amendment slave or a U.S. citizen. They do this to hide what they are doing. Remember that the U.S. Citizen is a legal fiction with no rights. You are not a legal fiction.

The two main things to remember on the Passport Application, is to....

Put all zeros for the social security number. 000 00 0000

Every place that it asks if someone is a U.S. citizen, you check off No. If you check off yes, then that makes you a U.S. Citizen. Otherwise you are a state Citizen. NO ONE IS A U.S. CITIZEN. Not you, or your spouse, or your ex-spouse or your Mom or Dad. This is the most important step.

Additional things you can do is...

Put "In care of:" with the mailing address and use the standard mailing address with zip code. This means that this is merely where you receive your mail and you do not live in their jurisdiction. And for the permanent address, use "R.F.D." or "Rural Free Delivery" for the address and then the city and spell out the name of the state. Then use all zeros for the zip code. This means that you live in the Republic and not in any fictional democratic jurisdiction.

Put "without prejudice" above your signature. This insures that you are not a legal fiction and are not contracting away your rights. Although this should not be needed as a State Citizen.

Even if you already got a passport before, you can get a new passport with this method or do an amended form for your current passport. I have no experience with an amended form.

It's my understanding that most all the 'laws' mentioned on the Passport form are for U.S. Citizens and not for State Citizens. They are only there to scare you.

Traps to avoid.

Do not put down that you are a U.S. Citizen on anything or give your social security number. Use all zeros for the social security number if you have to give them one, and check off either

Do not put down that you are a U.S. Citizen on anything or give your social security number. Use all zeros for the social security number if you have to give them one, and check off either “non-citizen national” or “other” for your citizenship. It’s a felony for them to force your social security number from you. 42 USC 408 A-8

When you get a job, fill out the W-8 form rather than the W-4. Check off non-citizen national. You can use your social security number here if you wish to pay in to that @System@. Claiming State Citizen does not prevent you from getting any ‘benefits’ from anything.

When you buy a gun and fill out the form, do not check off that you “have renounced your U.S. Citizenship.” You never were a U.S. Citizen, so there is no citizenship to renounce.

Once you receive your passport, you should never have to pay taxes, you can carry any gun, you should not get tickets, you do not need licenses, permits and fees -the only thing you cannot do is cause injury. They can arrest you for causing injury to someone. And anyone that causes injury needs to be arrested.

Even though you can do all these things, i highly recommend that you do not shove it in their face. Be on good behavior and do not draw attention to yourself. Also give any Peace Officer or Revenue Generator a friendly chance to discover who you are. Always use the passport for your ID. I highly recommend that you order the card, to carry in your wallet or purse.

If some bureaucrat tries to make you pay taxes or disparages your rights, as a State Citizen you have every right to put a claim on their bond. All State employees have bonds, but Federal workers and officers do not. Each state is different. In most states, the employees for local government and counties are with the County Recorder, or the County department of Risk Management, or with the County ‘judge’ who is the administrator and does not try cases.

State employees and officials normally have their bonds either with the Department of State or the Department of Risk Management which is usually under the Insurance Commission. They have to provide a State Citizen all documents for free. They cannot violate the Constitution for the united States of America -article one, section ten- which states that they can only use gold or silver coin for payment of debts. If they do not, then you can claim their bonds too. Be fair with the injury that you claim. Make all claims about rights secured by the Constitution of the State or the Constitution for the united States of America. It is my understanding, that once you claim a bond and or report a crime to the bond company, that official will never work for government again.

I have received a passport using this method. And so have many others using similar methods. The first two steps are the most important. It is the difference between night and day. Foreclosures are being stopped cold because they cannot collect debt against a State Citizen.

Below is an example of how the form may be filled out. Do not sign it until you’re in front of the authorized agent. Personally, i no longer capitalize any letters of my body’s name.

This document is not to be taken as ‘legal’ advice, and i do not accept any liability for what anyone does with the information.
